

OBELIUS TECHNOLOGIES

First-Week Onboarding Guide
Welcome to the team!

For all new employees | January 2026

We're really glad you're here. Your first week is all about getting comfortable — with your tools, your team, and the way we work. This guide walks you through everything you need to do from Day 1. Take it at a reasonable pace, and never hesitate to ask for help.

Day 1 — Getting Set Up

Today is about the basics. By end of day, you should be connected, configured, and security-compliant.

- **Collect your laptop** from reception. Your key card for office access is also available there.
- **Set up your Obelius email** — instructions are in the welcome email sent to your personal address. Enable MFA immediately.
- **Join Slack** using your new Obelius email. You'll find your department channel and #general already waiting.
- **Complete IT Security Training** — the link is in your onboarding Notion page. This must be done on Day 1. It takes approximately 45 minutes.
- Say hello in **#introductions** on Slack — share a little about yourself and your role.

Day 2 — Meeting Your Team & Tools

Today you'll meet the people you'll be working with most closely and get access to the tools you'll use every day.

- **Meet your immediate team** — your Team Lead will introduce you in a short informal session.
- **GitHub access:** Your Team Lead will send a GitHub invite. Accept it and verify access to the relevant repositories.
- **Notion access:** You'll receive an invite to the Obelius Notion workspace. Start with the Engineering Handbook page.
- Review the **current sprint board** with your Team Lead to understand what the team is working on.
- Set up **Tailscale VPN** following the IT Security Policy instructions (page 1 of the IT Security Policy document).

Days 3–5 — Getting Into the Flow

By mid-week, the focus shifts from setup to understanding how the business works.

- **Attend department introduction meetings** — your manager will schedule these with each department head. These are 30-minute overview sessions, not deep dives.
- **Complete your HR onboarding form** on the HR portal at hr.obelius.com. This includes your bank details for payroll, emergency contact, and ID verification.
- **Schedule your first 1:1 with your manager** for the end of the week. Use it to discuss your initial impressions, any questions, and what your first 30 days will focus on.
- Shadow a team member on a current task or code review — just observe and ask questions.

- Read through the relevant section of the **product documentation** on Notion.

Key Contacts

Who to Contact	For What	How
IT Support	Laptop issues, software access, VPN, GitHub	it@obelius.com
HR Team	Payroll, HR forms, policy questions, complaints	hr@obelius.com
Your Team Lead	Day-to-day work questions, tools, processes	Slack DM
Reception	Office access, key card, visitor passes	Ground floor desk

Your first week sets the tone — be curious, ask questions, and don't try to absorb everything at once. We're all here to help. Welcome to Obelius.
